## In the Claims:

Please amend Claims 2, 14, and 32 as follow. Please cancel Claims 7, 9, 11, 36, 38, and 40 without prejudice. Please add Claims 44-49. The following list of claims will replace all prior versions, and listings, of claims in the application:

## List of Claims:

- (Original) A vaccine for protecting a horse against diseases associated with EHV-1, EHV-4 or a combination thereof comprising: chemically inactivated EHV-1 KyA virus; and an adjuvant which includes cross-linked olefinically unsaturated carboxylic acid polymer.
- (Currently Amended) The vaccine of claim 1 wherein the EHV-1 KyA virus is chemically inactivated by treatment with a chemical inactivating agent which includes a compound selected from the group consisting of ethylenimine, derivatives of binary ethylenimine, acetylethylenimine and mixtures thereof.
- 3. (Original) The vaccine of claim 2 wherein the EHV-1 KyA virus is chemically inactivated by treatment with binary ethylenimine.
- (Original) The vaccine of claim 1 further comprising inactivated EHV-4.
- (Original) The vaccine of claim 1 further comprising inactivated equine influenza virus.
- (Original) The vaccine of claim 5 wherein the inactivated equine influenza virus includes inactivated EIV virus subtype A1.
- 7. (Canceled)

- 8. (Original) The vaccine of claim 5 wherein the inactivated equine influenza virus includes inactivated EIV virus subtype A2.
- 9. (Canceled)
- 10. (Original) The vaccine of claim 5 comprising inactivated EIV virus subtype A1 and inactivated EIV virus subtype A2.
- 11. (Canceled)
- 12. (Original) The vaccine of claim 1 wherein said vaccine is capable of protecting horses against EHV-1 and EHV-4.
- 13. (Original) The vaccine of claim 1 wherein the cross-linked olefinically unsaturated carboxylic acid polymer includes cross-linked acrylic acid polymer.
- 14. (Currently Amended) A vaccine for protecting a horse against diseases associated with EHV-1, EHV-4 or a combination thereof comprising:
  - EHV-1 KyA virus inactivated by treatment with a chemical inactivating agent which includes ethylenimine, a derivative of binary ethylenimine, acetylethylenimine or a mixture thereof; and
  - a bioadhesive adjuvant which includes a cross-linked olefinically unsaturated carboxylic acid polymer.
- 15. (Original) The vaccine of claim 14 wherein the chemical inactivating agent includes binary ethylenimine.

Atty. Dkt. No. 041303-0138 Appl. Ser. No. 09/812,720

16. (Original) A vaccine for protecting a horse against diseases associated with EHV-1, EHV-4 or a combination thereof comprising:

inactivated EHV-1; and

an adjuvant which includes a cross-linked acrylic acid polymer having a viscosity of no more than about 20,000 cPs at 20 rpm as a 1.0 wt.% aqueous solution at pH 7.5.

17. (Original) A method for protecting a horse against diseases associated with EHV-1, EHV-4 or a combination thereof comprising:

administering to said horse a vaccine comprising chemically inactivated EHV-1 KyA virus and an adjuvant which includes cross-linked olefinically unsaturated carboxylic acid polymer.

18. (Original) The method of claim 17 wherein administering the vaccine to said horse comprises:

parenterally administering the vaccine; and intranasally administering the vaccine.

19. (Original) The method of claim 18 wherein administering the vaccine to said horse comprises:

parenterally administering the vaccine at least once in a first step; and intranasally administering the vaccine in a subsequent step.

- 20. (Original) The method of claim 17 wherein the vaccine further comprises inactivated EHV-4.
- 21. (Original) The method of claim 17 wherein the vaccine further comprises inactivated equine influenza virus.
- 22. (Original) The method of claim 21 wherein the vaccine comprises inactivated EIV virus subtype A1 and inactivated EIV virus subtype A2.
- 23. (Canceled)

- 24. (Canceled)
- 25. (Canceled)
- 26. (Canceled)
- 27. (Original) A kit comprising in combination, (1) a dispenser capable of administering a vaccine to a horse; and (2) a composition to protect against diseases associated with EHV-1, EHV-4 or a combination thereof, wherein the composition comprises:

chemically inactivated EHV-1 KyA virus; and an adjuvant which includes cross-linked olefinically unsaturated carboxylic acid polymer.

- 28. (Original) The kit of claim 27 wherein the dispenser is capable of dispensing its contents as droplets; and the composition is capable of protecting against diseases associated with EHV-1, EHV-4 or a combination thereof when administered intranasally.
- 29. (Canceled)
- 30. (Canceled)
- 31. (Canceled)

- 32. (Currently Amended) A vaccine for protecting a horse against diseases associated with EHV-1, EHV-4 or a combination thereof comprising:
  - EHV-1 KyA virus inactivated by treatment with a chemical inactivating agent which includes ethylenimine, a derivative of binary ethylenimine, acetylethylenimine or a mixture thereof; and
    - a bioadhesive adjuvant which includes a cross-linked acrylic acid polymer.
- 33. (Previously Added) The vaccine of claim 32 further comprising inactivated EHV-4.
- 34. (Previously Added) The vaccine of claim 32 further comprising inactivated equine influenza virus.
- 35. (Previously Added) The vaccine of claim 34 wherein the inactivated equine influenza virus includes inactivated EIV virus subtype A1.

- 36. (Canceled)
- 37. (Previously Added) The vaccine of claim 34 wherein the inactivated equine influenza virus includes inactivated EIV virus subtype A2.
- 38. (Canceled)
- 39. (Previously Added) The vaccine of claim 34 comprising inactivated EIV virus subtype A1 and inactivated EIV virus subtype A2.
- 40. (Canceled)
- 41. (Previously Added) The vaccine of claim 32 further comprising gentamicin.
- 42. (Previously Added) The vaccine of claim 32 comprising EHV-1 KyA virus inactivated by treatment with a chemical inactivating agent which includes binary ethylenimine.

- 43. (Previously Added) The vaccine of claim 32 wherein the cross-linked acrylic acid polymer has a viscosity of no more than about 20,000 cPs at 20 rpm as a 1.0 wt.% aqueous solution at pH 7.5.
- 44. (New) The vaccine of claim 14 further comprising inactivated EHV-4.

37

- 45. (New) The vaccine of claim 14 further comprising inactivated EIV virus subtype A1 and inactivated EIV virus subtype A2.
- 46. (New) The vaccine of claim 16 wherein the EHV-1 KyA virus is chemically inactivated by treatment with binary ethylenimine.
- 47. (New) The vaccine of claim 16 further comprising inactivated EIV virus subtype A1 and inactivated EIV virus subtype A2.
- 48. (New) The kit of claim 27 wherein the chemically inactivated EHV-1 KyA virus is chemically inactivated by treatment with binary ethylenimine.
- 49. (New) The kit of claim 27 wherein the composition further comprises inactivated EIV virus subtype A1 and inactivated EIV virus subtype A2.
